Foreword	xvi
Preface	xvii
Acknowledgments	xviii
Contributors	xix
Introduction	xxv

Part I: Overview of Fundamental Concepts

1. Biomechanically Relevant Anatomy and Material Properties of the Spine and Associated Elements	3
<i>Ghani Haider, Kelly H. Yoo, Neelan Joseph Marianayagam, Anand Veeravagu</i>	
Learning Objectives	3
Key Principles	8
Questions	3
Answers	5
References	8
2. Physical Principles and Kinematics	10
<i>Mohamad Bydon, Sarah E. Johnson, Patrick M. Flanigan</i>	
Learning Objectives	10
Key Principles	21
Questions	10
Answers	13
References	21
3. Stability and Instability of the Spine	23
<i>James Rizkalla, Joseph Weiner, Brandon D. Lawrence</i>	
Learning Objectives	23
Key Principles	30
Questions	23
Answers	26
References	30

Part II: Spine and Neural Element Pathology

4. Bone Quality	33
<i>Rajiv Saigal</i>	
Learning Objectives	33
Answers	36
Questions	33
Key Principles	40

5.	Degenerative and Inflammatory Diseases of the Spine	41		
	<i>Eric Mong, Glenn A. Gonzalez, James S. Harrop</i>			
	Learning Objectives	41	Key Principles	52
	Questions	41	References	52
	Answers	45		
6.	Trauma, Tumor, and Infection	53		
	<i>Shawn W. Adams, Brian J. Williams</i>			
	Learning Objectives	53	Key Principles	59
	Questions	53	References	59
	Answers	56		
7.	Spinal Deformations	60		
	<i>Rakesh Kumar, Venu Nemani, Rajiv Sethi, Jean-Christophe Leveque</i>			
	Learning Objectives	60	Key Principles	68
	Questions	60	References	68
	Answers	63		
8.	Neural Element Injury	69		
	<i>Karl Janich, Marjorie C. Wang</i>			
	Learning Objectives	69	Key Principles	75
	Questions	69	References	75
	Answers	71		
9.	Correlation of the Anatomical and Clinical Domains	76		
	<i>Leo J.Y. Kim, Andrew T. Dailey</i>			
	Learning Objectives	76	Key Principles	83
	Questions	76		
	Answers	80		
Part III: Spine Surgery				
10.	Surgical Approaches to the Subaxial Spine	87		
	<i>Luis M. Tumialán</i>			
	Learning Objectives	87	Key Principles	94
	Questions	87	References	94
	Answers	92		

11. Destabilizing Effects of Spine Surgery	95		
<i>Kevin Hines, India Shelley, James S. Harrop</i>			
Learning Objectives	95	Key Principles	100
Questions	95	References	100
Answers.....	98		
12. Spine Fusion	101		
<i>Gabrielle Santangelo, Thomas A. Pieters, Daniel M. Sciubba</i>			
Learning Objectives	101	Key Principles	109
Questions	101	References	110
Answers.....	104		
Part IV: Spine Instrumentation Constructs: General Principles			
13. Implant Material Properties	113		
<i>Harel Deutsch</i>			
Learning Objectives	113	Key Principles	120
Questions	113	References	120
Answers.....	115		
14. Component–Component Interfaces	121		
<i>Rafid Kasir, Bobby Tay</i>			
Learning Objectives	121	Key Principles	131
Questions	121	References	132
Answers.....	124		
15. Implant–Bone Interfaces	133		
<i>Christopher A. Sy, Terrence T. Kim, J. Patrick Johnson</i>			
Learning Objectives	133	Key Principles	142
Questions	133	References	142
Answers.....	137		

16. Qualitative Attributes of Spinal Implants: A Historical Perspective ..	144		
<i>Theodore J. Choma</i>			
Learning Objectives	144	Key Principles.....	149
Questions	144	References.....	149
Answers	147		
17. Quantitative Attributes of Spinal Implants	150		
<i>Bradley Schmidt, Garret Greenaway, Daniel Resnick</i>			
Learning Objectives	150	Key Principles.....	158
Questions	150	References.....	158
Answers	153		
18. Construct Design.....	159		
<i>Megan Finneran, Paul M. Arnold</i>			
Learning Objectives	159	Key Principles.....	165
Questions	159	Reference	165
Answers	162		
19. Construct Failure and Prevention.....	166		
<i>Fabian Carballo Madrigal, Maxwell Boakye</i>			
Learning Objectives	166	Key Principles.....	179
Questions	166	References.....	179
Answers	169		
Part V: Spine Instrumentation Constructs: Region Specific Considerations			
20. Craniocervical and Upper Cervical Constructs.....	183		
<i>John Williams, Andrew M. Hersh, Nicholas Theodore</i>			
Learning Objectives	183	Key Principles.....	192
Questions	183	Reference	192
Answers	186		
21. Ventral Subaxial Spine Constructs.....	193		
<i>Sanjay Dhawan, Mayur Sharma</i>			
Learning Objectives	193	Questions	193

Answers.....	198	References	204
Key Principles	204		
22. Dorsal Subaxial Spine Constructs			205
<i>Shawn W. Adams, Muhammad Abd-El-Barr</i>			
Learning Objectives	205	Key Principles	213
Questions	205		
Answers.....	208		
23. Interbody Constructs			214
<i>Mohamed Macki, Praveen V. Mummaneni</i>			
Learning Objectives	214	Key Principles	223
Questions	214		
Answers.....	217		
24. Lumbosacral-Pelvic Constructs			224
<i>Raj Swaroop Lavadi, Thomas J. Buell, Nitin Agarwal, D. Kojo Hamilton</i>			
Learning Objectives	224	Key Principles	231
Questions	224	References	232
Answers.....	226		
25. Regional Nuances			233
<i>Joravar Dhaliwal, Vikram B. Chakravarthy, Ryan Khanna, Mark Bilsky</i>			
Learning Objectives	233	Key Principles	239
Questions	233	References	239
Answers.....	235		
Part VI: Spine Instrumentation Constructs: Deformity, Management, and Prevention Strategies			
26. Deformity Prevention and Correction: Component Strategies			243
<i>Rohit Mauria, Doniel Drazin</i>			
Learning Objectives	243	Key Principles	260
Questions	243	References	260
Answers.....	246		

27. Deformity Prevention and Correction: Complex Clinical Strategies	261		
<i>Joseph S. Hudson, Thomas J. Buell, David O. Okonkwo</i>			
Learning Objectives	261	Key Principles	270
Questions	261	References	270
Answers	264		
28. Complex Instrumentation Constructs and Force Applications	271		
<i>Shawn W. Adams, Brett Rocos</i>			
Learning Objectives	271	Key Principles	277
Questions	271		
Answers	274		
Part VII: Iatrogenic Pathologies and New Spine Surgery Techniques and Technologies			
29. Subsidence and Dynamic Spine Stabilization	281		
<i>Benjamin Motley, Owoicho Adogwa, Juan C. Mejia, Joseph Cheng</i>			
Learning Objectives	281	Key Principles	288
Questions	281	References	288
Answers	284		
30. Vertebral Augmentation	289		
<i>Shawn W. Adams</i>			
Learning Objectives	289	Key Principles	293
Questions	289	Reference	293
Answers	291		
31. Adjacent Segment Degeneration and Disease	294		
<i>Nikhil Jain</i>			
Learning Objectives	294	Key Principles	300
Questions	294	References	300
Answers	296		
32. Motion Preservation Technologies	301		
<i>Daniel Farivar, Christopher A. Sy, Terrence T. Kim</i>			
Learning Objectives	301	Questions	301

Answers.....	308	References	312
Key Principles	312		
33. Minimally Invasive Spine Surgery	314		
<i>Jacob L. Goldberg, Joseph A. Carnevale, Ibrahim Hussain, Roger Härtl</i>			
Learning Objectives	314	Key Principles	320
Questions	314	References	320
Answers.....	316		
34. Construct Failure and Failure Prevention: The Decision-Making Process	321		
<i>David Freeman, Michael Wang</i>			
Learning Objectives	321	Key Principles	327
Questions	321		
Answers.....	324		
Part VIII: Nonoperative Spine Stabilization			
35. Bed Rest and Traction	331		
<i>Emily Payne Sieg, Sarah Danehower</i>			
Learning Objectives	331	Key Principles	337
Questions	331	References	337
Answers.....	333		
36. Spine Bracing	339		
<i>Ian Connolly, Muhamed Hadzipasic, Theresa Williamson</i>			
Learning Objectives	339	Key Principles	346
Questions	339	References	347
Answers.....	342		
37. Exercises, Conditioning, and Other Nonoperative Strategies	348		
<i>Stephen M. Bergin, Khoi D. Than</i>			
Learning Objectives	348	Key Principles	354
Questions	348	References	354
Answers.....	351		

Part IX: Synthesis: Putting it All Together

38. Biomechanical Testing	357
<i>John V. Wainwright, Guilherme Bastos Ferreira Porto, Kylee Shivok, James S. Harrop</i>	
Learning Objectives	357
Key Principles	365
Questions	357
Reference	365
Answers	361
39. The Decision-Making Process: A Reprise	366
<i>Clayton L. Rosinski, Timothy C. Ryken</i>	
Learning Objectives	366
Key Principles	373
Questions	366
References	373
Answers	369
Index	375
