Preface	xvii
----------------------	------

Contributors	xix
---------------------------	-----

Section 1: Sellar and Parasellar Tumors

1. Transsphenoidal Approaches to the Sella and Suprasellar Region	3
--	---

Analiz Rodriguez and Behnam Badie

Introduction	3	Tumor Removal	7
Preoperative Evaluation	4	Closure Technique	7
Direct Endonasal Approach	5	Sublabial and Transseptal Approaches	7
Positioning	5	Postoperative Care	8
Instrumentation	5	Conclusion	8
Operative Technique	5		

2. Eyebrow Orbitotomy Approach to Parasellar Tumors	11
--	----

Analiz Rodriguez and Behnam Badie

Introduction	11	Operative Technique	11
Indications	11	Conclusion	12

3. Expanded Endonasal Approach to the Sella and Anterior Skull Base	15
--	----

Ricardo L. Carrau, Daniel M. Prevedello, Andre Beer Furlan, Ralph Abi Hachem, and Amin B. Kassam

Introduction	15	Intradural Endoneurosurgical Dissection Techniques ...	16
Patient Selection	15	Hemostatic Techniques	17
Preoperative Preparation	16	Sellar Approaches	18
Operative Procedure	16	Extended Approaches	20
General Exposure	16	Transcribiform Approach	22
		Postoperative Management	24
		Discussion	24

Section 2: Intraventricular Tumors

4. Endoscopic Approaches to Intraventricular Tumors	27
--	----

Mark Calayag, Reid Hoshide, Jillian Plonsker, and Michael L. Levy

Introduction	27	The Endoscope	27
Patient Selection	27	Determination of Approach	29
Preoperative Preparation	27	Operative Procedure	29
		General Considerations	29

Tumor Biopsy	30	Approach to the Fourth Ventricular Tumors	33
Tumor Resection	31	Postoperative Management	34
Approach to Tumors in the Lateral Ventricles	32	Conclusion	34
Approach to Third Ventricular Tumors	33		
5. Surgical Approaches to Tumors of the Third Ventricle	35		
<i>Vincent DiNapoli, Shaan M. Raza, Kevin Yao, and Frederick F. Lang</i>			
Introduction	35	Operative Procedures	40
Surgical Anatomy	35	Transforaminal and Transchoroidal	
Patient Selection and Choice of		Approaches	40
Operative Approach	36	Translamina Terminalis Approach	41
Preoperative Preparation	39	Endoscopic Endonasal Approach	43
		Postoperative Management	44
6. Surgical Approaches to Intraventricular Tumors (Lateral Ventricles)	47		
<i>Joseph H. McMordie, Adam Grooms, Collin Liu, and Michele R. Aizenberg</i>			
Tumors of the Lateral Ventricles	47	Transcallosal Approach	51
Anatomy of the Lateral Ventricles	49	Transcortical Approach	52
Patient Selection and Preoperative		Temporal Approaches	52
Preparation	51	Postoperative Management	55
Operative Approaches	51	Conclusion	55
Section 3: Spinal and Peripheral Nerve Tumors			
7. Surgical Management of Spinal Meningiomas	59		
<i>Yiping Li, Vikas Parmar, and Daniel K. Resnick</i>			
Patient Selection	59	Postoperative Management	63
Preoperative Preparation	60	Conclusion	64
Operative Procedure	60		
8. Surgical Management of Spinal Metastatic Tumors: The Anterior Lumbar Approach			
and the Lateral Retroperitoneal Approach to the Thoracolumbar Spine	65		
<i>Kurt Eichholz, Timothy Ryken, Luigi Pascarella, and William Sharp</i>			
Patient Selection	65	Postoperative Management	69
Preoperative Preparation	65	Conclusion	70
Operative Procedure	66		
Anterior Transperitoneal Lumbar Approach	66		
Anterior Retroperitoneal Approach	68		
Anterolateral Retroperitoneal Approach	68		

9. Surgical Management of Peripheral Nerve Tumors	71
<i>Carlos E. Restrepo, Amelia C. Van Handel, and Robert J. Spinner</i>	
Introduction	71
Patient Selection	71
Preoperative Preparation	71
Operative Procedure	72
Schwannoma	76
Neurofibroma	78
Other Benign Peripheral Nerve Tumors or Tumor-Like Lesions	78
Extraneural Tumors	80
Malignant Peripheral Nerve Tumors	80
Postoperative Management	80
Secondary Intraneural Metastasis	80
Pancoast Tumors	82
Conclusion	82
10. Intramedullary Tumors of the Spine	83
<i>Nancy Abu-Bonsrah, Godwin Abiola, C. Rory Goodwin, and Daniel M. Sciubba</i>	
Introduction	83
Patient Selection	84
Preoperative Preparation	84
Operative Management	86
General Operative Guidelines	86
Surgical Technique	87
Postoperative Management	90
Conclusion	90
11. Lateral Extracavitary Approach	93
<i>Todd Harshbarger and Mike Y. Chen</i>	
Introduction and Historical Background	93
Patient Selection	93
Preoperative Evaluation	93
Procedure	93
OR Preparation and Setup	94
Positioning	94
Incision and Exposure	94
Laminectomy, Costotransversectomy, and Transpedicular Approach	94
Reconstruction	96
Postoperative Management and Complications	96
Discussion	96
Section 4: Malignant Brain Tumors	
12. Neuroblate Laser Ablation of Intracranial Tumors	101
<i>Mithun G. Sattur, Danilo Silva, and Gene H. Barnett</i>	
Introduction	101
Background	101
Technical Details of NeuroBlate System	101
Patient Selection	102
Diagnosis	102
Lesion Characteristics	102
Preoperative Preparation	103
Operative Procedure	104
Postoperative Management	106
Interpreting the Postoperative MRI	106
Complications	106
Illustrative Case Examples	107
Case 1: Newly Diagnosed GBM	107
Case 2: Case Selection	107
Case 3: Use of Multiple Trajectories	107
Case 4: Postablation Major Hemorrhage	107
Conclusion	107

13. Stereotactic Resection of Malignant Brain Tumors	111
<i>Andrew E. Sloan</i>	
Patient Selection	111
Preoperative Preparation	111
Image Acquisition	112
Operative Procedure	112
Anesthetic Considerations	112
Surgical Procedure	112
Operating Room Configuration	113
Patient Positioning	113
Registration	114
Surgical Planning	114
Skin Incision and Craniotomy	114
Electrophysiological Mapping Technique	115
Resection	116
Closure Techniques	118
Postoperative Management	118
Illustrative Cases	118
Patient with Multiple Brain Metastasis	118
Patient with Glioma in Wernicke's Area	118
Patient with Glioma Deep in the Motor Cortex	119
14. Awake Craniotomy	121
<i>Sujit S. Prabhu</i>	
Introduction	121
Patient Selection	121
Preoperative Preparation	121
Operative Procedure	122
Cortical Stimulation for Speech Mapping	122
Cortical and Subcortical Monitoring for Motor Mapping	125
Intraoperative Seizures	125
Intraoperative Neurological Decline or Deficit	125
Tumor Resection	125
Postoperative Management	127
Conclusion	127
15. Radiosurgery of Intracranial Lesions	129
<i>Tomas Garzon-Muvdi, Ahmed Awad, and Michael Lim</i>	
Introduction	129
Stereotactic Radiosurgery: Sources of Radiation	129
Gamma Knife (GK) Radiosurgery	129
Linear Accelerator (LINAC) Radiosurgery	129
Proton-Beam Therapy	130
Cyberknife (CK)	131
Patient Selection	131
Benign Tumors	132
Meningiomas	132
Vestibular Schwannomas	133
Pituitary Adenomas	133
Functional Neurosurgery	134
Arteriovenous Malformations	135
Glioblastoma	135
Metastatic Tumors	135
Alternatives to Radiosurgery	135
Preoperative Management and Operative Procedure	135
Gamma Knife Radiosurgery	135
Cyberknife	136
Linear Accelerator–Based Radiosurgery	136
Postoperative Management	137
Complications	137
Conclusion	137

Section 5: Surgical Management of Meningiomas

16. Surgical Management of Meningiomas of the Sphenoid Wing Region: Operative Approaches to Medial and Lateral Sphenoid Wing, Spheno-Orbital, and Cavernous Sinus Meningiomas	143
<i>Rafael A. Vega, Charles F. Opalak, and William C. Broaddus</i>	
Introduction	143
Neuroanatomical Considerations	143
Lateral Sphenoid Wing Meningiomas	144
Medial Sphenoid Wing Meningiomas	144
Spheno-orbital Meningiomas	144
Cavernous Sinus Meningiomas	146
Patient Selection	147
Preoperative Management	148
Operative Procedure	149
Positioning	149
Initial Exposure	149
Craniotomy and Bone Flap	149
Dural Opening	151
Tumor Resection	152
Orbital Decompression and Reconstruction	154
Closure	154
Postoperative Management	154
Conclusion	154
17. Surgical Management of Convexity Meningiomas	155
<i>Floyd Thompson III and Nam D. Tran</i>	
Anatomy	155
Patient Selection	155
Preoperative Management	156
Operative Procedure	157
Postoperative Management	160
18. Surgical Technique for Removal of Clinoidal Meningiomas	161
<i>Joung H. Lee, James J. Evans, Michael P. Steinmetz, and Jeong-Taik Kwon</i>	
Introduction	161
General Considerations for Removal of Clinoidal Meningiomas	161
Patient Selection	162
Alternatives to Surgery	162
Preoperative Management	163
Operative Procedure	163
Positioning	163
Incision	163
Craniotomy	163
Skull Base Technique	163
Dural Opening	165
Tumor Removal	165
Closure	166
Postoperative Management	166
Conclusion	167
19. Surgical Management of Olfactory Groove Meningiomas	169
<i>Franco DeMonte and Shaan M. Raza</i>	
Introduction	169
Patient Selection	169
Preoperative Preparation	169
Operative Procedure	170
Bifrontal Biorbital Approach	170
Endonasal Endoscopic Approach	171
Postoperative Management	175
Conclusion	175

20. Petrosal Approach for Resection of Petroclival Meningiomas	177
<i>James K. Liu, Jayson A. Neil, and William T. Couldwell</i>	
Introduction	177
Patient Selection	178
Preoperative Preparation	178
Radiographic Evaluation	178
Preoperative Hearing Status	178
Intraoperative Monitoring	179
Anesthetic Techniques	179
Choosing the Appropriate Surgical Approach	179
Operative Procedure	180
Patient Positioning	180
Skin Incision and Craniotomy	180
Mastoidectomy and Posterior Petrosal Bone Removal	181
Anterior Petrosal Bone Removal (Extended Middle Fossa)	182
Dural Incision	182
Tumor Removal	183
Wound Closure	184
Variations on the Approach	184
Postoperative Management	184
Complication Avoidance	185
21. Surgical Assessment and Management of Tentorial Meningiomas	187
<i>Pradeep Setty and Daniel R. Pieper†</i>	
Introduction	187
Clinical Presentation	188
Preoperative Evaluation	189
Management	189
Surgical Approaches	189
T1 Lesions	189
Extended Middle Fossa Approach	189
T2 and T7 Lesions	192
Petrosal Approach	192
T3–T6 Lesions	194
Combined Occipital–Suboccipital Craniotomy	194
Tumor Resection	194
Complications	195
22. Surgical Management of Tuberculum Sellae Meningiomas	197
<i>Walavan Sivakumar, Garni Barkhoudarian, Chester Griffiths, and Daniel F. Kelly</i>	
Introduction	197
Patient Selection	197
Management of Incidental Meningiomas	197
Preoperative Preparation	198
Operative Procedure	198
Choice of Operative Approach	198
Microscope versus Endoscope	199
Supraorbital Eyebrow Craniotomy	199
Endonasal Endoscopic Transsphenoidal Approach	203
Postoperative Management	205
Conclusion	205
Section 6: Posterior Fossa Tumors	
23. Surgical Approaches to Pineal Region Tumors	211
<i>Adam M. Sonabend, Alfred T. Ogden, Jeffrey N. Bruce, and Nina Yoh</i>	
Introduction	211
Patient Selection and Preoperative Preparation	211
Operative Procedure	212
Operative Approaches for Resection	212
Biopsy Procedures for the Pineal Region	216
Postoperative Management	216
Conclusion	217

24. Surgical Approaches to Pediatric Midline Posterior Fossa Tumors	219
<i>Bermans J. Iskandar and Elias Rizk</i>	
Patient Selection	219
Preoperative Preparation	219
Operative Procedure	219
Anesthesia	219
Operative Positioning	220
Operative Procedure	221
Opening	221
Tumor Resection	221
Closing	222
Postoperative Management	222
Potential Complications	223
Conclusion	223
25. Surgical Approaches to Vestibular Schwannomas	225
<i>Mark Pyle, Roham Moftakhar, and Behnam Badie</i>	
Introduction	225
The Translabyrinthine Approach	225
Patient Selection	225
Advantages and Disadvantages	225
Preoperative Preparation	225
Operative Procedure	226
Postoperative Management	227
The Retrosigmoid–Transmeatal Approach	227
Patient Selection	227
Preoperative Preparation	227
Operative Procedure	227
Postoperative Management	228
Middle Cranial Fossa Approach	228
Patient Selection	228
Preoperative Preparation	228
Operative Procedure	228
Postoperative Management	229
Conclusion	229
26. Surgical Resection of Lower Clivus–Anterior Foramen Magnum Meningiomas	231
<i>Donato Pacione and Chandranath Sen</i>	
Introduction	231
Patient Selection	231
Preoperative Preparation	231
Far-Lateral Approach	232
Anesthesia and Intraoperative Monitoring	232
Positioning	232
Skin Incision and Soft Tissue Dissection	232
Isolation of the Vertebral Artery	232
Bone Removal	233
Dural Opening and Tumor Resection	233
Closure	234
Postoperative Management	234
Advantages and Limitations	234
Expanded Endoscopic Endonasal Transclival Approach	236
Anesthesia and Intraoperative Monitoring	236
Positioning	236
Approach	236
Dural Opening and Tumor Resection	237
Closure	237
Postoperative Management	237
Advantages and Limitations	237
Conclusion	239
27. Surgical Management of Trigeminal Schwannomas	241
<i>John Diaz Day and Thomas Whitfield Morris III</i>	
Introduction	241
Patient Selection	241
Preoperative Preparation	244
Operative Procedure	245

The Extradural Frontotemporal Temporopolar Approach	245	Postoperative Management	247
Positioning	245	Outcomes	248
Surgical Technique	245	Microneurosurgery	248
The Extradural Subtemporal Anterior Transpetrosal Approach	246	Stereotactic Radiosurgery	248
Positioning	246	Conclusion	249
Surgical Technique	246		
28. Surgical Management of Intracranial Glomus Jugulare Tumors	251		
<i>William E. Gordon, Wayne Hamm, Jon H. Robertson, and L. Madison Michael II</i>			
Introduction	251	Operative Approaches	253
Patient Selection	251	Postoperative Management	257
Preoperative Preparation	252	Cranial Nerve Palsy	257
Operative Procedure	253	Cerebrospinal Fluid Leakage and	
Anesthesia and Monitoring	253	Wound Healing	258
Positioning	253	Vascular Injury	258
		Conclusion	258
Section 7: Skull Base Approaches			
29. Preauricular Transzygomatic Subtemporal Approach to the Skull Base	261		
<i>Hafiz Patwa, Ricardo L. Carrau, Daniel M. Prevedello, and Amin B. Kassam</i>			
Introduction	261	Relevant Anatomy	263
Patient Selection	261	Anatomical Corridors	263
Preoperative Preparation	262	Exposure and General Considerations	263
History and Physical	262	Postoperative Management	268
Preoperative Imaging Studies	262	General considerations	268
Operative Procedure	263	Complications	268
		Conclusion	268
30. Combined Craniofacial Resection of Anterior Skull Base Tumors	269		
<i>Gregory K. Hartig</i>			
Introduction	269	Pericranial Flap Development	273
Preoperative Preparation and Patient Selection	270	Endoscopic Endonasal Reconstruction	273
Presenting Symptoms	270	Frontal Craniotomy	273
Tissue Diagnosis	270	Facial Exposures	274
Radiographic Evaluation	270	High Points of Typical Craniofacial	
Overall Treatment Planning	271	Excision Using Bifrontal Craniotomy	
Operative Procedure	272	and Lateral Rhinotomy Approaches	274
Anesthetic Considerations	272	High Points of the Endoscopic	
Patient Positioning and Preparation	272	Endonasal Approach	276
Incision	272	Reconstruction Considerations	277
		Postoperative Management	277

31. Transmaxillary Approaches to the Clivus	279
<i>Patrick J. Gullane, John R. de Almeida, Michael J. Odell, Peter C. Neligan, and Christine B. Novak</i>	
Introduction	279
Anatomy	279
Preoperative Evaluation	279
Imaging	279
Dental Evaluation	279
General Medical/Anesthetic	280
Patient Positioning	280
Tarsorrhaphy	280
Tracheostomy	280
Lumbar Cerebrospinal Fluid (CSF) Drainage	280
Prophylactic Antibiotics	280
Corticosteroids and Mannitol	280
Transmaxillary Surgical Approaches	280
Lateral Rhinotomy ± Medial Maxillectomy	280
LeFort I Osteotomy	280
Maxillotomy	281
Labiomandibular Glossotomy	281
Endoscopic Approaches to the Clivus	281
Postoperative Care	284
Tracheostomy	284
Antibiotics	284
Lumbar Drain	284
Complications	284
CSF Leak	284
Pneumocephalus	284
Meningitis	284
Wound Infection	285
Dysphagia	285
Palatal Fistula	285
Serosus Otitis Media/Eustachian Tube Dysfunction	285
Conclusion	285
32. Surgical Management of Cholesterol Granulomas of the Petrous Apex	287
<i>Rami Almefty, Mark B. Eisenberg, and Ossama Al-Mefty</i>	
Introduction	287
Patient Selection	287
Preoperative Preparation	289
Operative Procedure	289
Postoperative Management	291
Conclusion	291
33. Transbasal Approaches to the Skull Base and Extensions	293
<i>Iman Feiz-Erfan, Robert F. Spetzler, Randall W. Porter, Stephen P. Beals, Salvatore C. Lettieri, Douglas A. Hardesty, Andrew S. Little, and Edward F. Joganic</i>	
Introduction	293
Patient Selection	293
Preoperative Preparation	293
Operative Procedures	293
Indications for the Transbasal Approaches and Their Modifications	293
Cribiform Plate Osteotomy	294
Transbasal Approach	296
Extended Transbasal Approach	297
Subcranial Transbasal Approach	297
Radical Transbasal Approach	300
Expanded Endonasal Endoscopic Approaches	301
Postoperative Management	301
Conclusion	301
34. Surgical Resection of Clival Tumors	303
<i>Peleg M. Horowitz, Shaan M. Raza, and Franco DeMonte</i>	
Introduction	303
Patient Selection	303
Preoperative Preparation	305
Operative Procedure	306

Contents

Endoscopic Endonasal Approach	306	Postoperative Management	312
Transtemporal Approaches	309	Conclusion	312
Transcondylar Approach	310
