 Allergic processes 8, 44
 basophilia and 124
 eosinophilia and 124
 Anemia 80, 106–107
 aplastic 8, 48, 56, 131, 140, 148–150
 bone marrow analysis 53, 54, 56
 classification 128
 congenital dyserythropoietic (CDA)
 147, 148
 diagnosis 130–131
 Diamond–Blackfan 146
 dimorphic 152
 hemolytic 131, 140–145
 causes 142
 microangiopathic 144, 150
 with erythrocyte anomalies
 144–145
 hemorrhage and 131
 hyperchromic 128, 152–155
 causes 152
 hyper-regenerative 128
 hypochromic 128–139
 bone marrow analysis 134–137
 infectious/toxic 131, 134–135, 136
 iron-deficiency 128–133, 136
 sideroachrestic 137
 with hemolysis 138–139
 hypoplastic 140
 congenital 146
 hyporegenerative 128
 immunohemolytic 8
 macrocytic 152–153

 megaloblastic 43, 54, 56, 131,
 152–154
 normochromic 128, 140–151
 bone marrow analysis 140
 hemolytic 140–145
 renal 146
 paraneoplastic 131
 pernicious 140, 154
 refractory 106
 in transformation 108
 with excess blasts (RAEB) 54, 106
 with ring sideroblasts 106
 renal 146
 secondary 131, 134, 135, 136
 sickle cell 142, 144, 145
 sideroachrestic 131, 137
 sideroblastic 137
 smoldering 54
 Anisocytosis 130, 134–135, 137–139,
 152–153, 170
 Anulocytes 132, 133
 Ascites 186–187
 Auer bodies 89, 96–99
 Autoantibodies 142
 Autoimmune processes 8, 180
 anemia and 134
 autoagglutination 142, 143
 eosinophilia and 124
 Automated blood count 19–20
 Azurophilic granules 96, 100

B

B-lymphocytes 48, 49
 function 6
 see also Lymphocytes
 Band cells 4, 6, 38–39, 57, 153
 diagnostic implications 38, 112, 113
 normal ranges and mean values 12
 Basophilia 124–126
 Basophilic stippling 134, 135,
 137–139, 156–157
 Basophils 44–45, 125

- Basophils, diagnostic implications 44
 - elevated counts 124–126
 - function 5, 6
 - in chronic myeloid leukemia 118, 120, 121
 - normal ranges and mean values 13
 - Bicytopenia 106, 149
 - Blast crisis
 - in chronic myeloid leukemia 120–121

 Thalassemia 131, 138–139, 142
 major 138, 139
 minor 138, 139
 Thrombocytes 7, 33, 50–51, 165–169
 counts 15, 25
 diagnostic implications 50
 function 7
 normal ranges and mean values 13
 Thrombocythemia
 essential (ET) 8, 26, 56, 114, 170–171
 diagnosis 170
 idiopathic 122
 Thrombocytopenia 8, 56, 80, 113, 164–169
 due to increased demand 164–167
 due to reduced cell production 168–169
 in chronic myeloid leukemia 121
 in hypersplenism 166
 in microangiopathy 166
 in myelodysplasia 107
 Thrombocytopenic purpura (TTP) 131, 144, 166
 post-transfusion 166
 Thrombocytosis 170–171
 reactive 170
 Thrombopoiesis 3
 Tissue mast cells 125, 126
 Toxic effects 8
 anemia 134
 Toxic granulation 40–41, 113
 diagnostic implications 42
 Toxoplasmosis 176, 178, 180
 lymphomatous 66
 Tricytopenia 102, 106, 149
 Trophozoites 158, 161
 Tuberculosis 178, 180–181
 Tularemia 179
 Tumors
 anemia and 134
 biopsy 23
