## A

Absorbable sutures 84  
Acute hydrocephalus  
– in colloid cyst 65  
– presentation 44  
– treatment 47  
Acute hydrocephalus 42  
Acute obstructive hydrocephalus 42  
Acute tonsillar herniation 32  
Adolescent onset 121  
Age at presentation 42  
Age-based differential diagnosis 19  
Aneurysm detection 32  
Aneurysm mistaken for colloid cyst 23  
Anterior and posterior neuropores 4  
Anterior communicating artery 11  
Anterior cyst wall grasping 137  
Anterior third ventricle, lesions 19  
Anterior third ventricular colloid cyst 69  
Anterior third ventricular region 65  
Anterior transcallosal approach 65, 68  
Anterior wall of third ventricle 11  
Anterolateral approach 48  
Anterolateral burr hole 54  
Anterolateral endoscopic approach 102  
Anterolateral trajectory 53, 135  
Apex of third ventricle 47  
Aqueduct of sylvius 11  
Arteries related to the third ventricle 12  
Asymptomatic colloid cyst observation 79  
Asymptomatic colloid cysts 41  
Ataxia symptoms 140  
Auer et al neuroendoscopic procedures 91  
Axial cyst diameter 44  
Axial diameter of colloid cysts 42

## B

Barrow neurosurgical institute study 85  
Basilar artery 13  
Beaumont's three-zone stratification 9  
Benign brain tumors 3  
Benign intraventricular tumors 123  
Bilateral fornices 119  
Bimanual dissection  
– limitations and techniques 92  
– technique through channel ventriculoscope 91  
Bimanual dissection 129  
Bimanual endoscopic technique 135, 136  
Bimanual microsurgery 123  
Bimanual sharp dissection 93  
Bimanual surgical technique 53  
Bimanuality in endoscopy 135  
Bipolar and monopolar cautery 135  
Bipolar cautery, for wound hemostasis 70  
Bipolar cautery 130  
Bipolar coagulation 137  
Bipolar diathermy probe 96  
Blood supply of colloid cyst wall 80

Blood-CSF barrier 5  
Bone flap repositioning 121  
Brain structures related to the third ventricle 15  
Brain tumor incidence 3  
Brainpath 123  
Bregma as cranial landmark for surgery 79  
Bridging veins mobilization 70  
Broca's area 135  
Burr hole  
– closure 106  
– creation 102  
– placement 110  
Burr hole 101  
Burr hole and neuroendoscope holder 140

## C

Cadaveric dissection of frontal region 125  
Catheter angiography (CA) 32  
Caudate nucleus indentation 96  
Cavitational aspiration 119  
Cavum septi pellucidi presence 93  
CCRS sensitivity and specificity 44  
Central canal 4  
Cephalic flexure 3  
Cerebral aqueduct 3  
Cerebral ventricles 3  
Cerebral ventricular system and colloid cysts 3  
Cerebrospinal fluid (CSF) 117  
– diversion 41  
– exchange 140  
– flow 11  
– obstruction 101  
Cervical flexure 3  
Cholesterol esters 23  
Choroid fissure 121  
Choroid plexus  
– cauterization 105  
– coagulation 54, 110, 124  
– development 4  
Choroid plexus 6, 9, 73, 121, 130  
– development 5  
– differentiation 3  
– identification 75  
– in colloid cyst 4  
– in third ventricle 11  
– papilloma 19  
– removal in colloid cyst surgery 82  
– tumor 117  
Choroidal appendages 54  
Choroidal fissure 13, 55, 66  
– opening 93  
Choroidal fold development 8  
Ciliated colloid cysts 9  
Cingulate sulcus 118  
Coagulating electrode 140  
Coagulation and sharp dissection 137  
Coaxial techniques 76  
Cognitive biases in diagnosis 20  
Colloid cyst (CC) 73  
– appearance on CT 20  
– aspiration challenges 20  
– axial diameters 42  
– capsule cautery 102  
– capsule dissection 105  
– case presentation 4  
– diagnosis 34, 94  
– discovery via PCC 32  
– found during sinusitis scan 30  
– histology 7  
– hydrocephalus risk factors 79  
– imaging characteristics 22  
– imaging with enhancement 28  
– incidental finding 22  
– location 47  
– mimics 19  
– MR signal variability 23  
– post-surgical imaging 33  
– removal 94  
– removal approach trajectories 47  
– risk prediction 41  
– size and symptoms 41  
– surgical intervention support 79  
– surgical opening 7  
– surgical removal controversy 79  
– with migraine symptoms 57  
– with positional headaches 58  
– with unilateral ventriculomegaly 57  
– with ventriculomegaly 29  
Colloid Cyst Risk Score 45  
Colloid Cyst Risk Score (CCRS) 41, 52, 79, 109  
Colloid cyst risk zones 9, 42  
Colloid cysts of third ventricle  
– acute hydrocephalus and death 44  
– cerebrospinal fluid dynamics 47  
– clinical decision-making and CCRS 44  
– endoscopic surgery 48  
– hydrocephalus 44  
– incidental patients 42  
– obstructive hydrocephalus 47  
– stereotactic drainage 48  
– symptomatic patients 43  
– transcranial open microsurgical approaches 48  
Colloid cysts of third ventricle 19  
Commissural plate 4  
Consensus panel, for colloid cyst cases 56  
Consensus panel 51  
Contralateral ventricle access 139  
Conversion from endoscopic to open resection 86  
Corpus callosum 117  
Cortical transgression 48  
Corticectomy 73, 75, 121, 124  
– in colloid cyst surgery 81  
Cosmetic considerations for skin incision 91  
Cotton balls 121  
Cranial anatomy during surgical approach 79  
Craniopharyngioma  
– suprasellar origin 35  
– with hydrocephalus 25  
Craniopharyngioma 6, 19, 34, 117  
Craniotomy, and dura mater procedure 66  
Craniotomy 109, 124  
Craniotomy/dural opening 74

Critical neurovascular structures 55  
CSF diversion 11, 47  
CSF dynamics evaluation 32  
CSF dynamics management 47  
CSF flow analysis 23  
CSF leak studies 32  
CSF pressure gradients 32  
CSF shunting as treatment 48  
Curvilinear dural opening 70  
Cylindrical tube 123  
Cyst aspiration techniques 91  
Cyst attachment point 135  
Cyst attachment to tela choroidea 92  
Cyst capsule visualization 96  
Cyst content aspiration and wall coagulation 84  
Cyst content drainage 139  
Cyst diameter 43  
Cyst dissection plane 137  
Cyst enlargement and ventriculomegaly 41  
Cyst evacuation 130  
Cyst fenestration 119  
Cyst hyperintensity on MRI 43  
Cyst hyperintensity on T2-weighted MRI 44  
Cyst location in risk zone 44  
Cyst pedicle traction 96  
Cyst recurrence 99, 112  
Cyst regression 42  
Cyst removal 96  
Cyst size impact 135  
Cyst volume 43  
Cyst wall adherence to ICVS 84  
Cyst wall attachment point 137  
Cyst wall coagulation 130  
Cyst wall dissection 119  
Cyst wall remnants 55  
Cyst wall retraction 139  
Cyst wall turgor 75  
Cystic pituitary adenomas 35  
Cysts with cilia 9

## D

Decreased frontal horn diameter 131  
Deep venous system 73  
Devascularization of cysts 48  
Developmental lesions 3  
Diencephalic postvelar arch 9  
Diencephalic telencephalic junction 9  
Diencephalic vesicular recesses 3  
Diencephalon 3  
Diffusion tractography imaging 65  
Diffusion-weighted imaging (DWI) 21  
Dissection of the tinea fornicea 84  
Dominant vs. nondominant side 135  
Dry field technique for hemostasis 93  
Dual-port approach 48  
Dura mater 121  
Dural flap 117  
Durotomy 124  
Dynamic retraction 53
