Preface	xxvii
Contributors	xxviii

Section I: Acute Triage

Bart M. Demaerschalk, Devi P. Patra, Chandan Krishna, Rudy J. Rahme, Andrej Urumov, Mathew E. Welz, and Evelyn L. Turcotte

1. Clinical Presentation and Acute Triage of Ischemic Stroke, Intracranial Hemorrhage, and Subarachnoid Hemorrhage	3
<i>Devi P. Patra, Onur Açış, Miles Hudson, Benzion Blech, Gyanendra Kumar, Vanesa K. Vanderhye, Lynda M. Christel, and Bernard R. Bendok</i>	
1.1 Clinical Case	3
1.2 Introduction	3
1.3 Acute Ischemic Stroke	4
1.3.1 Prehospital Setting	4
1.3.2 EMS Assessment and Management	4
1.3.3 Rapid Screening for Presence of Large Vessel Occlusion	5
1.3.4 Hospital Setting	5
1.3.5 Initial Stabilization	5
1.3.6 Clinical Examination	6
1.3.7 Determination of Thrombolysis Eligibility	8
1.3.8 Assessment of the Presence of LVO and Eligibility for Mechanical Thrombectomy	9
1.4 Intracranial Hemorrhage	9
1.4.1 Presentation	9
1.4.2 Prehospital Setting	10
1.4.3 Hospital Setting	10
1.5 Subarachnoid Hemorrhage	11
1.5.1 Presentation	11
1.6 Conclusions	12
1.7 Clinical Case Answers	12
References	13
2. Differential Diagnosis of Acute Ischemic and Hemorrhagic Stroke	15
<i>Lauren Ottenhoff, Daniel M. Heiferman, and José Biller</i>	
2.1 Clinical Case	15
2.2 Introduction	15
2.3 Differential Diagnosis of Ischemic Strokes: Common Stroke Syndromes	16
2.4 Internal Carotid Artery Syndrome	18
2.4.1 Large Hemispheric Infarctions	18
2.4.2 Carotid Artery Dissection/Chronic ICA Occlusion/Hyperperfusion Syndromes	18
2.5 Anterior Cerebral Artery Syndrome	18
2.6 Middle Cerebral Artery Syndrome	19
2.7 Posterior Cerebral Artery Syndrome	20
2.8 Top of the Basilar Artery Syndrome and Brainstem Syndromes	20
2.9 Lacunar Strokes	20
2.10 Anterior Choroidal Artery Infarction	21
2.11 Behavioral Abnormalities Due to Acute Stroke	21

2.12	Intracerebral Hemorrhage	21	2.13.2	Nonaneurysmal Perimesencephalic SAH	27
2.12.1	Hypertensive ICH	23	2.13.3	CNS Vascular Malformations	27
2.12.2	Cerebral Amyloid Angiopathy (CAA)	24	2.13.4	Cervicocephalic Arterial Dissection	27
2.12.3	CNS Vascular Malformations	24	2.13.5	Hematologic	27
2.12.4	Medication-Induced Hemorrhage	26	2.14	Conclusion	27
2.13	Subarachnoid Hemorrhage	26	2.15	Clinical Case Answers	27
2.13.1	Aneurysmal SAH	26		References	28
3.	Medical Imaging for Acute Ischemic and Hemorrhagic Stroke	29			
	<i>Andrew Pines, Austin Pena, and Brian W. Chong</i>				
3.1	Introduction	29	3.3.1	Diffusion-Weighted Imaging	34
3.2	Imaging Modalities: Computed Tomography	29	3.3.2	Perfusion-Weighted Imaging	34
3.2.1	Noncontrast Head CT	29	3.3.3	Magnetic Resonance Angiography	34
3.2.2	Computed Tomography Angiography	31	3.4	Summary	34
3.2.3	Computed Tomography Perfusion	33	3.5	Clinical Case Answers	35
3.3	Imaging Modalities: Magnetic Resonance Imaging	33		References	37
4.	The Promise of Telestroke	39			
	<i>Benzion Blech and Bart M. Demaerschalk</i>				
4.1	Clinical Case	39	4.5	Telestroke Quality and Outcome Metrics	45
4.2	Introduction	40	4.6	Telestroke Network Operational Considerations	45
4.3	Clinical Uses	40	4.6.1	Potential Obstacles	45
4.3.1	Telestroke in the Emergency Department Setting	40	4.6.2	Health Economic Evaluations of Telestroke	45
4.3.2	Telestroke in Settings Spanning the Continuum of Stroke Care	43	4.7	Comprehensive Virtual Stroke Centers of the Future	46
4.3.3	Telestroke in Clinical Research	44	4.8	Clinical Case Answers	46
4.3.4	Telestroke in Education	45		References	46
4.4	Technological Considerations	45			
5.	Innovations in Prehospital Management of Stroke	49			
	<i>Oana M. Dumitrascu and Cumara B. O'Carroll</i>				
5.1	Clinical Case	49	5.3.1	Mobile Stroke Ambulance: Ground and Air	54
5.2	Emergency Medical System and Stroke Systems of Care	50	5.3.2	Prehospital Brain Imaging	55
5.2.1	EMS Notification by the General Population	50	5.3.3	Prehospital Laboratory and Pharmacy	55
5.2.2	EMS Role in Stroke Triage	50	5.3.4	Cost-Effectiveness	55
5.2.3	EMS Stroke Assessment: Prehospital Scales	51	5.4	Prehospital Stroke Management	56
5.2.4	Triage and Transport to the Target Stroke Center	52	5.4.1	Telemedicine in Prehospital Stroke Evaluation	56
5.2.5	Concept of the "Golden Hour"	54	5.4.2	Treatment of Acute Ischemic Stroke	56
5.3	The Mobile Stroke Unit	54	5.4.3	Treatment of Hemorrhagic Stroke	56
			5.4.4	Neuroprotection and Clinical Research in Prehospital Setting	56

5.5	Future Directions	56	5.7	Clinical Case Answers	57
5.6	Conclusion	57		References	57
6.	Intravenous Fibrinolysis for Acute Ischemic Stroke				59
	<i>Timothy J. Ingall</i>				
6.1	Clinical Case 1	59	6.7.6	Patients without Capacity to Provide Consent to Treatment	66
6.2	Fibrinolysis	59	6.7.7	Early Ischemic Changes on CT Imaging	67
6.3	Fibrinolytic Drugs Studied for the Treatment of Acute Ischemic Stroke	60	6.7.8	Other Conditions Previously Considered by Some to be too Risky for “Off-label” Use of tPA	67
6.4	History of Fibrinolysis Treatment for Acute Cerebral Ischemia	61	6.8	Clinical Situations where there is Considerable Uncertainty about Administering tPA to an Acute Ischemic Stroke Patient	68
6.4.1	Clinical Case 2	61	6.9	Utilization of Telemedicine to Increase Use of Fibrinolytic Medication in the Treatment of Acute Ischemic Stroke	68
6.4.2	Case Management Issues	61	6.9.1	Clinical Case 5	68
6.5	Initial Restrictions for Administration of Intravenous Fibrinolytic Medication	62	6.10	Other Factors Impacting tPA Utilization Rates	69
6.5.1	Clinical Case 3	63	6.10.1	Stroke Systems of Care	69
6.6	Increasing Utilization of Fibrinolysis for Treating Acute Ischemic Stroke Patients	63	6.10.2	Teaching Hospitals	71
6.6.1	Clinical Case 4	64	6.11	Future Strategies to Increase Utilization of Fibrinolysis for the Treatment of Acute Ischemic Stroke	71
6.7	Revising Original Indications for the Use of Fibrinolytic Medication	64	6.12	Conclusion	71
6.7.1	Time from Stroke Onset, or Last Known to be at Usual Baseline	64	6.13	Clinical Case 1 Answers	72
6.7.2	Age and Baseline Stroke Severity	65		References	72
6.7.3	Rapidly Improving Neurological Deficits	66			
6.7.4	Use of Anticoagulation Medication	66			
6.7.5	Mild, Nondisabling, Symptoms at Presentation	66			
7.	Identifying Patients for Stroke Thrombectomy				75
	<i>Mithun G. Sattur, Evelyn L. Turcotte, Devi P. Patra, Karl Abi-Aad, Matthew E. Welz, Miles Hudson, and Bernard R. Bendok</i>				
7.1	Clinical Case	75	7.10	Posterior Circulation Stroke	80
7.2	Questions	76	7.10.1	Basilar Artery Occlusion	80
7.3	Introduction	77	7.10.2	Posterior Cerebral Artery Occlusion	80
7.4	AHA/ASA 2019 Guidelines	77	7.11	Special Situations	80
7.5	Technical Details	78	7.11.1	Low National Institutes of Health Stroke Scale Score	80
7.6	Low ASPECTS Trials	78	7.11.2	Poor Baseline Modified Rankin Scale	80
7.7	Medium and Distal Occlusions	79	7.11.3	Cancer	80
7.8	Intracranial Atherosclerotic Disease	80	7.12	Future Directions	81
7.9	Tandem Occlusion	80		References	81

8. Stroke Center Certification	83		
<i>Daniel Felbaum, Mandy J. Binning, and Erol Veznedaroglu</i>			
8.1 Clinical Case	83	8.3 Organization 2: Healthcare Facilities Accreditation Program	86
8.2 Stroke Accreditation	83	8.4 Organization 3: DNV GL	86
8.2.1 Joint Commission Certification Process	85	8.5 Clinical Case Answers	88
8.2.2 Level 2 Acute Stroke Ready Hospital	85	References	88
8.2.3 Primary Stroke Center	86		
8.2.4 Thrombectomy Capable	86		
8.2.5 Comprehensive Stroke Center	86		

Section II: Critical Care

Ayan Sen, Chandan Krishna, Rudy J. Rahme, Devi P. Patra, Mathew E. Welz, and Evelyn L. Turcotte

9. Critical Care Management of Acute Ischemic Stroke	91		
<i>Bhavesh Patel, Sneha Jacob, and Benzion Blech</i>			
9.1 Clinical Case	91	9.4 Common Neurocritical Care Complications	95
9.2 Introduction	92	9.4.1 Angioedema after IV tPA	95
9.3 Critical Care After Acute Ischemic Stroke ...	93	9.4.2 Symptomatic Intracranial Hemorrhage	95
9.3.1 Airway and Ventilation Management	93	9.4.3 Malignant Cerebral Edema	95
9.3.2 Blood Pressure Monitoring and Goals	93	9.4.4 Seizures	96
9.3.3 Antiplatelets, Systemic Anticoagulation, and Statin Therapy Initiation	93	9.4.5 Other Complications	96
9.3.4 Point-of-Care Ultrasound and Cardiac Telemetry	94	9.5 Conclusion	97
9.3.5 Neuromonitoring Modalities	94	9.6 Clinical Case Answers	97
		References	97
10. New Horizons for Hemorrhagic Stroke Critical Care Management	99		
<i>Ali H. Turkmani, Devi P. Patra, Evelyn L. Turcotte, Jose Omar Garcia, Chandan Krishna, and Bernard R. Bendok</i>			
10.1 Clinical Case 1	99	10.7.6 Anticonvulsants	103
10.2 Introduction	99	10.7.7 Cerebral Edema	103
10.3 Etiology/Risk Factors	100	10.7.8 Hydrocephalus and Intraventricular Hemorrhage	103
10.4 Medical Management	100	10.7.9 Anticoagulant-Related Intracranial Hemorrhage	104
10.5 Clinical Severity Assessment	101	10.8 Clinical Case 2	104
10.6 Emergency Department Management	101	10.8.1 Heparin and Low-Molecular-Weight Heparins ...	105
10.7 The Importance of Intensive Medical Therapies	101	10.8.2 Antiplatelet Agents	105
10.7.1 Fever	101	10.8.3 Factor Xa Inhibitors	105
10.7.2 Hyperglycemia	102	10.8.4 Direct Thrombin Inhibitor	105
10.7.3 Hypertension	102	10.9 Resuming Anticoagulation Therapy after Intracerebral Hemorrhage	105
10.7.4 Deep Veins Thrombosis	103	10.9.1 Outcome Predictions and Withdrawal of Life-Sustaining Treatments	106
10.7.5 Steroids	103		

10.10	Conclusion	106	References	107
10.11	Clinical Case Answers	106		
11.	Critical Care Management of Subarachnoid Hemorrhage and Vasospasm			109
	<i>Sarah Merrill and Ayan Sen</i>			
11.1	Clinical Case	109	11.12	Cardiac Arrhythmias and Cardiomyopathy ... 113
11.2	Introduction	109	11.13	Glucose
11.3	Grading of Subarachnoid Hemorrhage	109	11.14	Fever
11.4	Diagnostic Challenges	109	11.15	Deep Vein Thrombosis
11.5	Initial Stabilization	111	11.16	Vasospasm and Delayed Cerebral Ischemia
11.6	Common Complications	111	11.17	Prevention of Vasospasm
11.7	Seizures	111	11.18	Detection of Vasospasm
11.8	Blood Pressure	112	11.19	Treatment of Vasospasm
11.9	Hydrocephalus	112	11.20	Conclusion
11.10	Rebleeding	112	References	115
11.11	Hyponatremia	113		
12.	Management of Anticoagulation and Antiplatelets in Hemorrhagic Stroke: Administration and Reversal			117
	<i>Babu G. Welch, Jonathan A. White, and Mark D. Johnson</i>			
12.1	Clinical Case	117	12.3.1	Intracerebral Hemorrhage with a Mechanical Cardiac Valve
12.1.1	Questions	117	12.3.2	Acute Stenting with MCA Infarct
12.2	Introduction	117	12.3.3	Atrial Fibrillation with Hemorrhagic Conversion of Infarct
12.2.1	Pharmacology and Reversal of Antiplatelets	118	12.4	Conclusion
12.2.2	Pharmacology and Reversal of Anticoagulants	122	12.5	Clinical Case Answers
12.2.3	Challenges of Antiplatelets/Anticoagulants in SAH and ICH	123	References	125
12.3	Clinical Cases	123		
13.	Medical Management of Ischemic Stroke and Prevention			127
	<i>Rachel E. Carlin and Gyanendra Kumar</i>			
13.1	Clinical Case	127	13.2.5	Stroke Mimics
13.2	General Medical Management	127	13.2.6	Subsequent Workup and Monitoring
13.2.1	Initial Acute Management	127	13.3	Etiology-Specific Management
13.2.2	Blood Pressure, Temperature, and Blood Glucose Management	128	13.3.1	Large Artery Atherosclerosis
13.2.3	Antiplatelet Treatment	128	13.3.2	Cardioembolic
13.2.4	Additional Screening and Prophylaxis	129	13.3.3	Small Vessel Occlusion
			13.3.4	Other Determined Causes of Ischemic Stroke

13.3.5	Cryptogenic.....	135	13.5	Clinical Case Answers.....	137
13.4	Secondary Prevention.....	136		References.....	137
14.	Prognostication, Ethics, and Scales.....				139
	<i>Arturo Montaña and J. Claude Hemphill III</i>
