<b>Preface .....</b>	<b>5</b>	<b>2.4 Path of the signal from the sensor to the effector .....</b>	<b>55</b>
<b>Vitae .....</b>	<b>7</b>	<b>2.4.1 Processes at the sensor and at the trigger zone: from the generator potential to the frequency-coded signal .....</b>	<b>55</b>
<b>Abbreviations .....</b>	<b>8</b>	<b>2.4.2 Excitation propagation: slow continuous propagation and saltatory excitation propagation .....</b>	<b>56</b>
<b>Addresses .....</b>	<b>22</b>	<b>2.4.3 Transmission of excitation, synaptic transmission .....</b>	<b>59</b>
<b>Cells and excitable tissues</b>			
<b>1 Cell physiology .....</b>	<b>25</b>	<b>2.4.4 Processes at the target cell, postsynaptic potentials .....</b>	<b>61</b>
<i>Bernd Schröder, Christoph Rummel</i>			
<b>1.1 Basics of cell physiology .....</b>	<b>25</b>	<b>2.4.5 Integration of signals .....</b>	<b>63</b>
<b>1.2 The cell as the smallest functional unit of a living animal .....</b>	<b>25</b>	<b>2.5 Reflexes .....</b>	<b>65</b>
<b>1.3 Subcellular organisation of the cell .....</b>	<b>25</b>	<b>3 Sensory physiology .....</b>	<b>67</b>
<b>1.3.1 Intracellular organelles and the principle of compartmentalization .....</b>	<b>26</b>	<i>Heinz Breer, Cornelia A. Deeg, Michael Pees, Helga Pfannkuche, Holger Sann</i>	
<b>1.3.2 Cell membrane .....</b>	<b>27</b>	<b>General sensory physiology .....</b>	<b>67</b>
<b>1.3.3 Topography of membrane proteins .....</b>	<b>28</b>	<i>Heinz Breer</i>	
<b>1.3.4 Mobility of membrane proteins .....</b>	<b>29</b>	<b>3.1 General principles of sensory physiology .....</b>	<b>67</b>
<b>1.3.5 Anchoring of membrane proteins .....</b>	<b>29</b>	<i>General principles of sensory physiology .....</i>	<b>67</b>
<b>1.3.6 Cytoskeleton .....</b>	<b>29</b>	<b>3.2 Cutaneous senses .....</b>	<b>71</b>
<b>1.3.7 Cell-cell connections .....</b>	<b>29</b>	<i>Helga Pfannkuche</i>	
<b>1.4 Functions of the cell membrane .....</b>	<b>31</b>	<b>3.2.1 Mechanoreception in the skin .....</b>	<b>71</b>
<b>1.4.1 Barrier between intra- and extracellular space .....</b>	<b>31</b>	<b>3.2.2 Thermoreception in the skin .....</b>	<b>74</b>
<b>1.4.2 Transport by diffusion .....</b>	<b>32</b>	<b>3.2.3 Nociception and itching .....</b>	<b>74</b>
<b>1.4.3 Transport via membrane proteins .....</b>	<b>32</b>	<b>3.2.4 Transmission and central processing of signals from the skin .....</b>	<b>75</b>
<b>1.4.4 Transport by endo- and exocytosis .....</b>	<b>34</b>	<b>3.3 Nociception and pain .....</b>	<b>76</b>
<b>1.5 Membrane potential .....</b>	<b>34</b>	<i>Holger Sann</i>	
<b>1.5.1 Diffusion potentials and K<sup>+</sup> equilibrium potential .....</b>	<b>34</b>	<b>3.3.1 Pain in animals .....</b>	<b>76</b>
<b>1.5.2 Nernst equation .....</b>	<b>36</b>	<b>3.3.2 Peripheral mechanisms of nociception .....</b>	<b>77</b>
<b>1.5.3 Goldman-Hodgkin-Katz equation .....</b>	<b>36</b>	<b>3.3.3 Central mechanisms of nociception .....</b>	<b>79</b>
<b>1.6 Regulation of specialized cell functions .....</b>	<b>37</b>	<b>3.3.4 Plasticity of nociception .....</b>	<b>80</b>
<b>1.6.1 Cell volume regulation .....</b>	<b>37</b>	<b>3.3.5 Pain management .....</b>	<b>82</b>
<b>1.6.2 Intracellular pH regulation .....</b>	<b>37</b>	<b>3.4 Balance and hearing .....</b>	<b>83</b>
<b>1.6.3 Signal action and processing .....</b>	<b>38</b>	<i>Heinz Breer</i>	
<b>1.6.4 Cell cycle, growth and apoptosis .....</b>	<b>41</b>	<b>3.4.1 The sensory systems of the inner ear .....</b>	<b>83</b>
<b>2 General neurophysiology .....</b>	<b>43</b>	<b>3.4.2 Sense of balance, vestibular organ .....</b>	<b>84</b>
<i>Martin Diener, Bernd Schröder</i>			
<b>2.1 Tasks of the nervous system .....</b>	<b>43</b>	<b>3.4.3 The sense of hearing .....</b>	<b>85</b>
<b>2.2 Neural tissue .....</b>	<b>43</b>	<b>3.4.4 Cochlea .....</b>	<b>87</b>
<b>2.2.1 Structure and functional properties of the neuron .....</b>	<b>43</b>	<b>3.4.5 Neuronal processing of auditory signals .....</b>	<b>89</b>
<b>2.2.2 Functions of the glial cells .....</b>	<b>44</b>	<b>3.5 Vision .....</b>	<b>89</b>
<b>2.3 Basic principles of excitation of neurons .....</b>	<b>46</b>	<i>Cornelia A. Deeg</i>	
<b>2.3.1 Definitions .....</b>	<b>46</b>	<b>3.5.1 Structure of the eye .....</b>	<b>90</b>
<b>2.3.2 Passive membrane response to subthreshold stimuli .....</b>	<b>46</b>	<b>3.5.2 Reflex sequences .....</b>	<b>92</b>
<b>2.3.3 Active membrane response to suprathreshold stimuli: the action potential .....</b>	<b>48</b>	<b>3.5.3 Signal reception and processing of light stimuli in the retina .....</b>	<b>93</b>
<b>2.3.4 Ionic basis of the action potential .....</b>	<b>49</b>	<b>3.5.4 Tapetum lucidum .....</b>	<b>95</b>
		<b>3.5.5 Adaptation mechanisms .....</b>	<b>96</b>
		<b>3.5.6 Colour vision .....</b>	<b>96</b>
		<b>3.5.7 Central processing .....</b>	<b>97</b>
		<b>3.5.8 Pathophysiology .....</b>	<b>99</b>
		<b>3.6 Chemical senses: sense of smell and taste .....</b>	<b>100</b>
		<i>Heinz Breer</i>	
		<b>3.6.1 Sense of smell (olfactory sense) .....</b>	<b>100</b>
		<b>3.6.2 Sense of taste .....</b>	<b>105</b>

3.7	<b>Birds and reptiles</b> . . . . .	109	6.2.3	Movement function of skeletal muscle . . . . .	148
	<i>Helga Pfannkuche, Michael Pees</i>		6.2.4	Metabolic functions of skeletal muscle . . . . .	156
3.7.1	Senses in birds . . . . .	109	6.2.5	The role of skeletal muscle in health and disease . . . . .	158
3.7.2	Senses in reptiles . . . . .	111	<b>6.3</b>	<b>Smooth muscles</b> . . . . .	159
<b>4</b>	<b>Autonomic nervous system</b> . . . . .	<b>112</b>	6.3.1	Smooth muscle cell morphology . . . . .	159
	<i>Martin Diener</i>		6.3.2	Mechanisms of smooth muscle excitation . . . . .	161
4.1	<b>Function of the autonomic nervous system</b> . . . . .	112	6.3.3	Electromechanical coupling in smooth muscle . . . . .	162
4.2	<b>Structure of the sympathetic and parasympathetic systems</b> . . . . .	112	6.3.4	Energy balance of smooth musculature . . . . .	163
4.3	<b>Sympathetic and parasympathetic effects</b> . . . . .	114	<b>6.4</b>	<b>Cardiac muscle compared with skeletal muscle and smooth muscle</b> . . . . .	163
4.4	<b>Sympathetic and parasympathetic transmitters and receptors</b> . . . . .	116	6.4.1	Morphology . . . . .	164
4.4.1	Acetylcholine . . . . .	116	6.4.2	Excitation . . . . .	164
4.4.2	Adrenaline and noradrenaline . . . . .	116	6.4.3	Electromechanical coupling and contraction . . . . .	165
4.4.3	Cholinergic receptors . . . . .	117			
4.4.4	Adrenergic receptors . . . . .	117			
4.4.5	Cotransmitter . . . . .	118			
<b>4.5</b>	<b>Interaction with the endocrine system</b> . . . . .	<b>119</b>			
<b>4.6</b>	<b>Vegetative afferents</b> . . . . .	<b>119</b>			
<b>4.7</b>	<b>Vegetative reflexes</b> . . . . .	<b>120</b>	<b>7</b>	<b>Heart</b> . . . . .	<b>166</b>
<b>5</b>	<b>Central nervous system</b> . . . . .	<b>121</b>		<i>Gerhard Breves</i>	
	<i>Martin Diener, Melanie Hamann; former collaboration: R. Gerstberger</i>		<b>7.1</b>	<b>Functions of the heart</b> . . . . .	166
5.1	<b>Function of the central nervous system</b> . . . . .	121	7.2	<b>Heart as a pump</b> . . . . .	166
5.2	<b>Neuroanatomical structure</b> . . . . .	121	7.2.1	Heart action in four-quarter-beat . . . . .	167
5.2.1	Structure of the spinal cord . . . . .	121	7.2.2	The ventricles are never completely empty . . . . .	168
5.2.2	Parts of the brain . . . . .	122	7.2.3	Heart sounds . . . . .	169
5.3	<b>Transmitters in the central nervous system</b> . . . . .	124	7.2.4	Pumping capacity at rest . . . . .	169
5.3.1	Transmitter diversity . . . . .	124	7.2.5	Adjustment of cardiac power during physical work . . . . .	170
5.3.2	Neuronal projections . . . . .	125	7.2.6	Frank-Starling mechanism . . . . .	170
5.4	<b>Protective mechanisms of the brain</b> . . . . .	126	7.2.7	Ventricular contractility . . . . .	171
5.4.1	The cerebrospinal fluid space . . . . .	126	7.2.8	Adjustment of cardiac output at work . . . . .	172
5.4.2	The blood-brain barrier . . . . .	127	<b>7.3</b>	<b>Electrical activity of the heart</b> . . . . .	172
5.4.3	Microglia . . . . .	128	7.3.1	Comparison of contractile elements in cardiac muscle and skeletal muscle . . . . .	173
5.5	<b>Diagnostic methods</b> . . . . .	129	7.3.2	Two types of cardiac muscle cells . . . . .	173
5.5.1	EEG and evoked potentials . . . . .	129	7.3.3	Cardiac muscles as a functional syncytium . . . . .	173
5.5.2	MRI . . . . .	129	7.3.4	Generation and conduction of electrical impulses . . . . .	174
5.6	<b>Motor systems</b> . . . . .	130	7.3.5	Long-lasting cardiac action potentials . . . . .	175
5.6.1	Forms of movement . . . . .	130	7.3.6	Heart is not tetanisable . . . . .	176
5.6.2	The spinal motor system . . . . .	130	7.3.7	Autorhythmia of the heart . . . . .	176
5.6.3	The supraspinal motor system . . . . .	132	7.3.8	Sympathetic and parasympathetic nervous system regulate heart rate . . . . .	178
5.6.4	The cerebellum . . . . .	134	7.3.9	The sympathetic nervous system has a positive inotropic and lusitropic effect on cardiac muscle cells . . . . .	178
5.7	<b>Sensory systems</b> . . . . .	135	7.3.10	The parasympathetic nervous system acts on the sinus node, AV node and atrial musculature . . . . .	179
5.8	<b>The limbic system</b> . . . . .	138	7.3.11	Afferent fibres of the sympathetic and parasympathetic nervous system . . . . .	180
5.9	<b>Regulation of autonomous functions by the CNS</b> . . . . .	139	7.3.12	Atrial natriuretic peptide . . . . .	180
5.9.1	Brainstem . . . . .	139	7.4	<b>Energetics of the heart</b> . . . . .	180
5.9.2	Hypothalamus . . . . .	140	7.5	ECG – basics . . . . .	181
5.10	<b>Sleep</b> . . . . .	142	7.5.1	Physical principle . . . . .	181
5.11	Learning and memory . . . . .	143	7.5.2	Standard recording procedure . . . . .	182
