A

A-mode (amplitude modulation) imaging 6, 6

abscesses 131–139, *133, 134*

calcified 136

diagnostic criteria 132–138

edema 132

excluding malignancy 135–136

long-standing lesions 136

mass 132–134

peri-implant inflammatory processes 137

skin thickening 137

documentation 139

imaging role 138–139

lactational 131

management 138

nonpuerperal 131–132

see also mastitis

acoustic enhancement 4–5, 5, 52

acoustic impedance 3

acoustic shadow 3, 4, 52

carcinoma 4, 25–27, 53, 169–171, 171

scars 4, 159, 160

adenofibroma 141, 148

adenomyoepithelioma 148

adenosis tumor 141

adolescent breast 25, 63, 63, 64, 66

American College of Radiology accreditation 59

American Institute of Ultrasound in Medicine accreditation 59

anechoic pattern 50, 50

angular margin 48, 48

annular-array sector transducer 9, 10

antiradial scans 39

apocrine metaplasia 206

architectural distortion 55, 55

areola 64, 65

aspiration

abscesses 138

benign tumors 153

breast implants and 127, 128, 128, 207, 208

carcinoma 188, 188, 206

cysts 103, 108–109, 109, 114, 138, 139, 206, 207

fibrocystic tissue 97, 97

fine-needle aspiration cytology 205–208, 206, 242

fluid-filled lesions 207, 207, 208

instruments 205

solid lesions 205–207, 206, 207

lymph node 197

needle insertion technique 201–205, 202–204

attenuation 3–4

atypical ductal hyperplasia 52

axilla 62, 62, 67, 68–69

metastases 231, 232, 240, 241, 251

see also lymph nodes

axillary artery 68

axillary vein 68, 69

thrombosis 231

B

B-cell lymphoma 177

B-mode (brightness modulation) imaging 6, 7, 12

background echotexture 44, 44

benign solid tumors 141

diagnostic criteria 141–149

differential diagnosis 150–151

documentation 156

mammography 153

MRI 153–155

ultrasound 153

see also specific tumors

BI-RADS-US system 43–60

assessment categories 59, 75–76

classification categories 44–58

background echotexture 44, 44

calcifications 55–56, 55–56

masses 45–55, 45–55

special cases 56–58

vascularity 58, 59

development of 43

feature analysis 43–44

quality assurance 59–60

biopsy 208–210

see also core biopsy

blood flow measurement 245–246, 246

see also Doppler ultrasound

breast

anatomy 61–62, 61, 72–73, 72

sonographic morphology 62–67, 63–66

breast augmentation 117, 118, 121

carcinoma and 126

see also breast implants

breast carcinoma 32, 34, 167–190, 247

acoustic shadow 4, 25–27, 53, 169–171, 171

aspiration 188, 188, 207

clinical significance 167–168

core biopsy 188, 188, 221, 239

cystic disease and 185, 186, 187

diagnostic criteria 168–176

echogenicity 169, 170

effect on surrounding tissue 173, 174

hyperechogenicity 175–176, 175

margins 168–169, 169, 170

orientation 171–173, 172–174

posterior features 171, 172

shape 168–169

differential diagnosis 92, 165, 168, 180, 181

documentation 190

Doppler ultrasound applications 250

heterogenous 4

implants and 126–127, 127, 128

infiltrating

ductal 47–49, 53, 56, 112, 175, 217–218

lobular 47, 175, 218

inflammatory 55, 59, 137, 138

intracystic 48, 51, 107, 110, 112, 185, 186

intraductal 35, 56, 216–218, 216–218

invasive 11, 26, 31, 75, 95, 111, 113, 168, 216

ductal 56, 59, 138, 189–190, 250, 252

diagnosis 47–48, 94, 95, 112, 151, 168–174, 178, 181–184, 186

imaging 26, 33, 38, 236–238, 239–242, 245

screening 226

staging 215–217, 220

lobular 53, 54, 177, 178

squamous cell 179

male 49

medullary 179

metaplastic 55

mucinous 150, 179

multicentric 167, 186, 187, 190, 218–219, 220, 221, 224, 227, 250

multifocal 34, 113, 167, 177, 182, 213, 216, 218–219, 219, 225, 237, 240, 250, 250

necrotic 187

papillary 48, 178

recurrence 229, 230, 233, 234, 253

after mastectomy 126–127, 127, 128

detection of locoregional recurrences 229–233

ultrasound role 234

sites of occurrence 167

surgical planning 220–222

tubular 179

types of 167

ultrasound role 189
 vascularity 248–249

 acoustic shadowing 4, 159, 160
 clinical significance 157
 diagnostic criteria 159–164
 diagnostic problems 157–159, 157, 158, 159
 diagnostic procedures 164–166
 differential diagnosis 164, 180, 181
 documentation 166
Doppler ultrasound applications 250–251, 251
granuloma 164, 165, 253
hypertrophic scar formation 160–162, 162
ultrasound role 166
screening 223–227
 clinical significance 223
 prerequisites 223–224
 studies on 226–227
 target group 223
sebaceous cyst 57
sentinel node imaging 191
 see also lymph nodes
seroma, postoperative 128, 129, 162, 163, 164, 166, 234, 240
shadowing *see* acoustic shadow
silicone 57
 cyst 126, 127
 granuloma 126, 127
 see also breast implants
sinus histiocytosis 191
skin retraction/irregularity 55, 55
skin thickening 55, 55, 137
sound
 acoustic enhancement 4–5, 5
 acoustic impedance 3

attenuation 3–4
pulsed sound waves 6
speed of 3
wavelength 3
spatial resolution 16
specimen ultrasonography 212, 212, 213
spiculated margin 48, 49
staging *see* preoperative staging
standoff pads 31, 31
stromal fibrosis 52
surgical planning 220–222

T

tangential scans 39, 39
target ultrasound assessment of palpable masses 39
“teacup” calcifications 88, 146
test phantoms 15–21
 characteristics 15–16, 16
 test protocol 16–17
 test results 17–21, 17–20
thoracodorsal artery 68, 231
thoracodorsal vein 68
three-dimensional ultrasound 235, 243
 sample applications 238, 239
 technical principles 235–236, 236–238
thrombus 46
 axillary vein 231
time gain compensation (TGC) 5, 12, 14
tissue harmonic imaging 9
transducers 7–9
 electronic convex-array transducer 8
 electronic linear-array transducer 7–8, 8, 9, 241
 electronic sector transducer 9
 mechanical sector transducer 7, 8
 selection of 14–15
 field of view 14–15
 transducer frequencies 14
 two-dimensional annular-array sector transducer 9, 10
transverse scans 35–37, 37

U

ultrasound
 advantages of 76
 disadvantages of 77
 see also Doppler ultrasound; extended field-of-view ultrasound; interventional ultrasound; *specific applications*; three-dimensional ultrasound
ultrasound-guided localization 210, 211, 212

V

VacuFlash system 210
vacuum-assisted devices 208, 209, 210
vascularity 58, 59, 248–249

W

water-path scanning 23–27, 28
 immersion technique 24–25, 24–27, 28, 62, 63, 64
 water-bag technique 23, 23
wavelength 3
wide field-of-view imaging *see* extended field-of-view ultrasound
