Acknowledgement

To produce a high-quality large histological section is a complex and difficult task. The most important factor in this applied art is the skillful and ambitious laboratory technician. I wish to thank all my co-workers involved in producing large histological sections for the pleasure of looking at their artistic masterpieces and to dedicate this book to Britta Elborg, Britt-Marie Ericsson, Marie Högeström, Evelyn Karlsson, Birgitta Norén, to Lena Arvidsson, Irene Bergman, Kajsa Engfeldt, Birgitta Lind, Ingegerd Lindquist, Anita Paulsson and their colleagues. I hope that the reader will share my appreciation.
