Chapter 1 The Diagnostic Approach to Malignant Type Calcifications on the Mammogram		1
Overview of the Diagnostic and Management Problems Encountered When Malignant Type Calcifications Are Detected on the Mammogram 3	
Relative Frequency of Calcification Occurrence 4	
Distribution of All Histologically Verified Malignant Type Calcifications 4	
Malignancy Ratio of Casting Type Calcification Cases 5	
Malignancy Ratio of Crushed Stone-like / Pleomorphic Calcification Cases 6	
Malignancy Ratio of Powdery Calcification Cases 7	
Crushed Stone-like and Powdery / Cotton Ball-like Calcifications on the Mammogram 8	
Cluster Calcifications in Necrotic Malignant Tissue 14	
Classification of Crushed Stone-like Calcifications Produced by Malignant Processes 18	
Group 1 18	
Group 2 19	
Chapter 2 Group 1: One or Two Clusters of Crushed Stone-like Calcifications of the Mammogram Produced by Malignant Processes		21
Group 1A: The Mammographic Finding Represents the Main Histological Finding 24	
The Long-term Outcome of Cases in Group 1A 42	
Group 1B: Contiguous and Extensive Disease on Histology 46	
The Long-term Outcome of Cases in Group 1B 76	
Chapter 3 Multiple Clusters of Crushed Stone-like Calcifications on the Mammogram Produced by Malignant Processes		93
Group 2A: Multiple Foci on Histology with Intervening Normal Tissue 94	
Group 2B: Contiguous and Extensive Disease on Histology 157	
Chapter 4 Differential Diagnosis of Breast Diseases Producing Clustered, Discernible Calcifications		211
Introduction 212	
Fibrocystic Change: Pathophysiology, Imaging, and Differential Diagnosis 213	
Explanatory Illustration of the Pathophysiological Process Leading to the Formation of Teacup-like Calcifications in Fibrocystic Change 218	
Comparative Mammographic-Histological Demonstration of the Sediment Resulting in Teacup-like Calcifications 220	
Comparative Galactographic-Subgross 3D Histological Demonstration of Fibrocystic Change 222	
Demonstration of the Bilateral, Extensive Fibrocystic Change with Calcifications 226	
Demonstration of the Three Types of Calcifications Occurring in Fibrocystic Change 232	
Involutional Type Calcifications: Pathophysiology, Imaging, and Differential Diagnosis 262	
Fibroadenoma 278	
Papilloma 294	
Chapter 5 The Prognostic Importance of Mammographic Tumor Features		305
