

## Contents

### I Basics

#### 1 The Development and History of Fixed Appliances

*Franziska Bock*

<b>Development of Self-Ligating Bracket Systems</b> . . . . .	2	The 21st Century. . . . .	6
The 1980s. . . . .	4	<b>Expectations and Reality.</b> . . . .	7
The 1990s. . . . .	5		

#### 2 Materials

*Bjoern Ludwig and Bettina Glasl*

<b>Self-Ligating Brackets.</b> . . . . .	10	Rotation and Friction . . . . .	23
Bracket Base . . . . .	10	Rotation . . . . .	23
Shape of the Base . . . . .	10	Friction . . . . .	23
Bond Strength . . . . .	12	<b>Archwires</b> . . . . .	26
Bracket Body . . . . .	15	Archwire Sequence . . . . .	29
Slot . . . . .	16	Archwire Shape . . . . .	29
Friction . . . . .	17	<b>Auxiliaries.</b> . . . . .	30
Torque . . . . .	19	Elastics . . . . .	30
Auxiliary Slots . . . . .	22	NiTi Coil Springs . . . . .	31
Clips, etc.—SL Mechanics . . . . .	22		
Active Systems. . . . .	22		
Passive Systems . . . . .	23		

#### 3 Bracket Systems

*Heiko Goldbecher*

<b>Basic Principles</b> . . . . .	34	<b>Treatment.</b> . . . . .	50
<b>The Various Self-Ligating Bracket Systems</b> . . . . .	35	Shorter Chairside Time. . . . .	50
Damon 3 . . . . .	35	Bonding of Brackets. . . . .	50
In-Ovation R (GAC) . . . . .	36	Ligation of Archwires. . . . .	51
In-Ovation C (GAC) . . . . .	37	Debonding of the Fixed Appliances. . . . .	53
Opal (Ultradent). . . . .	38	Repairs . . . . .	53
Opal M (Ultradent) . . . . .	39	Reduction of Overall Treatment Time . . . . .	55
Quick 2 (Forestadent) . . . . .	40	Active Treatment. . . . .	55
SmartClip (3 M Unitek) . . . . .	41	Oral Hygiene of Self-Ligating Brackets . . . . .	58
Clarity SL (3 M Unitek). . . . .	42	Longer Intervals between Adjustments . . . . .	59
Speed (Strite Industries, Ltd.) . . . . .	43	Reduction of Staff . . . . .	60
Time 2 (American Orthodontics) . . . . .	44	<b>Summary</b> . . . . .	60
Time 3 (American Orthodontics) . . . . .	45		
Vision LP (American Orthodontics) . . . . .	46		
Discovery SL (Dentaurum) . . . . .	46		

## II Treatment

### 4 Diagnosis

*Bjoern Ludwig and Bettina Glasl*

<b>Standard Diagnostic Tools in Orthodontics</b> . . . . .	62	<b>Additional Diagnostic Tools</b> . . . . .	71
<b>Diagnosis and Treatment Planning</b> . . . . .	65		

### 5 Oral Hygiene

*Heiko Goldbecher and Jens Bock*

<b>Basics</b> . . . . .	73	<b>Prophylactic Measures</b> . . . . .	75
Symptoms and Etiology of Caries . . . . .	73	Bonding . . . . .	75
Epidemiology of Caries . . . . .	74	Active Tooth Movement . . . . .	76
Gingivitis and Periodontitis . . . . .	74	<b>Active Measures</b> . . . . .	78
<b>Hygiene Approaches for Fixed-Appliance Treatment</b> . . . . .	75	<b>Oral Hygiene after Fixed-Appliance Treatment</b> . . . . .	81

### 6 Bonding Techniques

*Heiko Goldbecher and Jens Bock*

<b>The Development and History of Bonding Techniques</b> . . . . .	83	<b>Direct and Indirect Bonding Techniques</b> . . . . .	92
<b>Positioning of Brackets</b> . . . . .	83	Direct Bonding . . . . .	92
Vertical Positioning . . . . .	83	Indirect Bonding . . . . .	94
Horizontal Positioning . . . . .	84	Transfer Trays . . . . .	94
<b>Bonding</b> . . . . .	86	Silicone Transfer Trays . . . . .	94
<b>Positioning of Self-Ligating Brackets</b> . . . . .	88	Vacuum-Formed Trays . . . . .	94

### 7 Treatment

*Bjoern Ludwig and Bettina Glasl*

<b>Space Creation</b> . . . . .	98	<b>Correction of Skeletal Discrepancies</b> . . . . .	148
Alignment . . . . .	98	Correction of a Class II Buccal Segment Relationship . . . . .	148
Biomechanics . . . . .	98	Functional Mandibular Advancer . . . . .	148
Expansion of the Arches . . . . .	101	Easy-Fit Jumper . . . . .	152
Crowding and Ectopic Canines . . . . .	104	Correction of Class III Malocclusions . . . . .	155
Treatment of Occlusion after Leveling and Alignment . . . . .	116	<b>Esthetic Treatment</b> . . . . .	159
Space Creation by Distalization . . . . .	124	Self-Ligating Ceramic Brackets . . . . .	159
Space Creation by Expansion of Arches . . . . .	135	Lingual Self-Ligating Brackets . . . . .	163
Space Creation by Extracting Teeth . . . . .	142		
Space Creation by Interproximal Reduction (IPR) . . . . .	148		

### 8 Auxiliary Equipment and Techniques

*Bjoern Ludwig, Bettina Glasl, and Thomas Lietz*

<b>Practical Application of Self-Ligating Brackets</b> . . . . .	173	<b>Detailing Bends</b> . . . . .	180
<b>Archwire Shift</b> . . . . .	178	Individualized Arches . . . . .	180
Slippery Archwires . . . . .	178	Correction of the Occlusion . . . . .	181

<b>Other Useful Auxiliaries</b> . . . . .	183	<b>Interproximal Enamel Reduction (Stripping)</b> . . .	195
Spikes . . . . .	183	<b>Recontouring of Incisal Edges</b> . . . . .	197
Bite Planes . . . . .	183	<b>Mini-Implants</b> . . . . .	199
Anterior Bite Planes . . . . .	184	Uses and Choice of a Mini-Implant System . . . . .	200
Lateral Bite Planes . . . . .	185	Planning the Biomechanics and Area of Insertion. . .	200
Combination of Buccal and Lingual Brackets (Hybrid Appliance) . . . . .	188	Attachments. . . . .	202
Auxiliary Slots . . . . .	191	Example Applications for Mini-Implants . . . . .	205

**9 Retention and Stability**

*Bettina Glasl and Bjoern Ludwig*

<b>Biological Basis</b> . . . . .	215	Retention in Class III Cases . . . . .	222
Active Tooth Movement. . . . .	215	Retention after Treatment for Deep Bites . . . . .	223
Functional Parameters of the Orovestibular System. . . . .	215	Retention after Treatment for Anterior Open Bites . . . . .	223
Patient's Age . . . . .	215	Retention after Correction of Significant Rotations and Severe Crowding . . . . .	224
Tooth Morphology . . . . .	216	The Spaced Dentition. . . . .	226
<b>Concepts of Retention</b> . . . . .	217	<b>Management of Relapse</b> . . . . .	230
Retention Protocol . . . . .	217	Interproximal Enamel Reduction (Stripping). . . . .	230
Relapse Prevention Based on the Original Malocclusion . . . . .	217	Individual Set-up for Vacuum-Formed Aligners . . .	231
Standard Retainers . . . . .	217	<b>SOX Retainers</b> . . . . .	231
Retention of Transverse Corrections. . . . .	222		
Retention of Class II Cases . . . . .	222		

<b>Index</b> . . . . .	236
